

New College Leicester

Learning and Sports Village

Principal: Mrs Jane Brown

Outstanding Progress for All

Dear Parents/Carers

As part of the NHS childhood vaccination programme your child will have an opportunity to receive their teenage booster and meningitis vaccinations at New College Leicester. The purpose of these vaccination is to provide protection for your child against tetanus, diphtheria, and polio and to provide protection against meningitis.

The vaccinations will be administered by nurses from The Community Immunisation Service from Leicestershire Partnership NHS Trust at New College Leicester during the morning of **Tuesday 19th March 2019**. On the day of the vaccinations your child should wear a white vest top or white t-shirt under their college shirt to make the vaccination process easier.

Your child will automatically receive the vaccination, unless you have returned the letter already sent to you by the immunisation team, stating that you do not want your child to receive the vaccination.

Yours sincerely

Mrs E Rudge-Tezcan
Assistant Principal
New College Leicester
